DATE OF BIRTH: 07/04/1996 AGE: 15 SEX: Female
DATE OF DEATH: June 1, 2012
DATE AND TIME OF AUTOPSY: June 1, 2012, at 11:00 A.M.
PROSECTOR: Robert L. Deters, M.D.

MANNER OF DEATH: Natural
CAUSE OF DEATH: Upper Gastrointestinal Hemorrhage
 due to: Rupture Of Distal Esophagus
 due to: Mallory-Weiss Syndrome

ANATOMIC DIAGNOSES

- I. Mallory-Weiss Syndrome
 - A. Rupture of distal esophagus
 - B. Upper gastrointestinal hemorrhage
- II. Pulmonary edema and congestion

TOXICOLOGY: Not performed

OPINION: The death of this 15 year old female, Arrian Jade Granden, is the result of upper gastrointestinal hemorrhage due to a rupture of the distal esophagus just proximal to the cardioesophageal junction. She had a several day history of nausea and vomiting. This is consistent with Mallory-Weiss Syndrome.

Case Summary

I responded to the above address for a death report on a 15 years of age female. When I arrived I was told that approximately 3 days earlier that the deceased and 5 other family members had suddenly started having severe nausea, vomiting and diarrhea. I was told that it was felt that they were suffering from some sort of food poisoning. Within 24 to 36 hours all but the deceased started to feel better. The deceased continued to suffer from the above described symptoms and became weaker over the next several hours until she was unable to attempt to eat or drink. She gradually became more lethargic and slipped into unconsciousness. She remained in this state for 4 to 5 hours and went into cardiac arrest. The deceased had no history of any other health issues prior to this. I advised the family that under the circumstance, her age and the suddenness of onset of the illness, I was going to order an autopsy to determine the cause of her death. Due to the number of family and friends at the residence, I chose to postpone any further physical examination until the autopsy. Dakan Funeral Home was requested to make removal of the body.
